

# SERIOUS FUN

## SERIOUS PLAY™

### Room To Grow

The N.Series single zone digital music server is the perfect introduction to whole house audio. With storage capacity ranging from over 500 CDs at MP3 (320kps) to 2000 CDs at MP3 (320kps) the N.Series can expand to handle your collection as it increases over the years.

### Your Music, Your Way

The N. Series allows you to instantly access hundreds of CDs by Artist, Album, Genre, and Song Title. Managing, editing, and searching is all possible with our powerful and easy to use onscreen menus.

### ARQIVE Your Music

Add an ARQIVE music back up system to your N.Series and gain peace of mind and the ability to have your music in different rooms. ARQIVE will automatically back up your collection using our patent-pending NetSync technology. This will create a perfect replica of your collection and accessed to perform similar to an N.Series.

### NetSync For iTunes®

With automatic 2-way synchronization with iTunes, it has never been easier to bring your whole music collection with you on your iPod. Now you can take your music for a car ride or to the gym to work out and your house will still be filled with music from your collection.

### Music Anywhere In the World

Your music is available to you anywhere in the world. With our free ARQLink Pro service you can access your music at any time of the day from any PC. Simply log into ARQLink pro and you can stream, manage, and create playlists.

### Complete Control

The N.Series can be controlled with the Built in web server or navigate your collection on your Plasma TV with the provided IR Remote.

SERIOUS PLAY

## NetSync For iTunes®

### Automatic Synchronization with iTunes® and Multiple iPods®

Easy-to-use synchronization between an AudioReQuest server and iTunes and multiple iPods –songs, playlists, podcasts, and metadata included. Add music or make playlists in iTunes and have it instantly available on your AutoReQuest. Add music and playlists on your AudioReQuest and have it available automatically in iTunes to synchronize with your iPod for on the go.

## NetSync 2.0

### Multi-Location Synchronization

Install additional AudioReQuest units in a second home, boat, or any location and the entire music collection is constantly updated and available on every server. Add music in any location and it is automatically added to all locations.

## ARQLink Pro

### Remote Access and System Health Maintenance

The ARQLink free online service provides access and management of every ReQuest system. Many parameters are constantly monitored and reported to the system's account on ARQLink.com. Any potential issue can be addressed before it becomes a problem.

## Automatic Dual Encoding

### Best Sound At Home, Perfect Format For On-the-Go

Store music in full fidelity WAV quality for the best sound at home, and also automatically have a copy in a lower bitrate MP3 format for streaming over the Internet or loading an entire collection to an iPod, phone, or portable music player.

## Different Moods for Different Rooms

### Add An Unlimited Number of Zones

Fill every room in the house with the same music or choose different musical genres to play in different rooms simultaneously. With NetSync, an unlimited number of zones can be added to a system.

## One Look, Many Choices

### Same Experience From Any Device

Innovative flash based interfaces allow access from any device that supports flash technology including computers, touch panels, and web tablets. Enjoy the same 2-way interactive interface on ReQuest touch screens, computers, web tablets, PDAs and cell phones.

## QuickSwap

### Removable Drives for Upgrade and Backup

iQ and ReQuest music servers have removable QuickSwap hard drives, providing easy upgrade to a larger hard drive when a collection grows, or if a problem should occur, the drive can easily be replaced with the automatic backup drive in ARQIVE.
