

SERIOUS INTERFACE

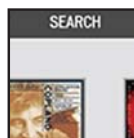

SERIOUS PLAY™

Browse by AlbumArt for Artist, Album, and Genre

With a vibrant display, quickly find your favorite music by the AlbumArt and title with a few taps on the touch screen.

Finding your music is easy

Search your collection by entering keywords, and you will find the results, whether searching are in artist, album, or track title. The results are bolded and sortable for easy addition to playlists or the Now Playing queue.

Drag and Drop Media Management

With the power of a touch screen, you can intuitively drag albums, artists, genres, or track titles to the Now Playing Queue and rearrange the order of what will play next.

Control for all Rooms

The TS.12 is the central control panel for your iQ or AudioReQuest systems. Change the volume in any room, play an XM station in the kitchen while setting up a playlist for the dining room.

On-the-Fly Playlist Creation

Making playlists have never been easier. Just drag and drop your favorite songs and albums into your personalized playlists. Discover new music and new favorites and add them to your playlist on-the-fly.

Plug and Play

The TS.12 is automatically recognized when attached to an iQ Multiroom or AudioReQuest system. No additional programming is necessary.

Serious Play 3.0 Media Manager

The TS.12 Touch Screen running the Serious Play 3.0 Media Manager introduces breakthrough music experiences that are both visually exciting and intuitively designed. It will positively change the way you listen to your music. Here are some of the innovative features of Serious Play 3.0 Media Manager, the ultimate in music server interfaces...

- Browse by cover art for Artist, Album, and Genre
- Drag and Drop Media Management
- On-the-Fly Playlist Creation
- Powerful Search Engine
- Volume control for all zones
- No Programming – Connect the TS.12 to any iQ or AudioReQuest and Serious Play 3.0 lights up

Once the Serious Play 3.0 graphical user interface is loaded, you will see a complete artist list on the left, album list with cover art in the center and transport controls and Now Playing and Playlists on the right. This is the Artist View as indicated by the orange highlight.

To view the albums, artists or genres on your AudioReQuest, click Album, Artist or Genre at the top of the screen. The Serious Play 3.0 Media Manager supports drag-and-drop functionality in all views. Click on any album and the song information appears from the bottom of the view window.
