XMUSIC

DIGITAL MUSIC SERVER

Use the custom SPLCD64V* - XMUSIC interface to browse the music by song title, album, artist name, or the genre.

Imagine the ability to quickly browse through an entire library of music, using it to create four distinct musical environments throughout your home, each customized to suit the tastes of a different member of the family. The new Xantech XMUSIC Digital Music Server is the centerpiece of a complete music entertainment system that makes all of this possible and much more.

With the ability to distribute up to four different songs to four different rooms of your home at the same time the XMUSIC is a perfect compliment to the Xantech MRC88 or MRAUDIO8X8 Multi-Zone Controller Amplifier. For the ultimate in control, Xantech SPLCD touchscreen controllers can provide status information display right on the screen, so you can know at a glance what's playing, from any of the touchscreens in the home.

Up to 2,800 hours** of music can be stored on the XMUSIC, easily ripped from your CDs at 20x real-time speed, and all neatly sorted by song title, album, artist name, and music genre. With the capability to create and store custom playlists, your music can be tailored to suit your unique tastes. Or simply select random play for a fresh variety every time.

The XMUSIC Digital Music Server is also compatible with Apple® iPod® and iTunes®, as well as Windows Media™ Player, allowing you complete flexibility in the ways you enjoy your music.

FEATURES INCLUDE

- 20x ripping speed from CD tray
- Four discrete analog audio outputs for independent multi-room listening
- Transfer music to portable digital music players (e.g. Apple® iPod™)
- Fast, easy access to your entire music collection
- Select music by artist, CD, track, genre, or playlist
- "Quick Add" feature allows you to add favorite tracks to a playlist "on the fly"
- "Preset" feature for quick, user-friendly access from standard keypads and remotes
- 160GB hard drive stores approximately 2,800 hours of music (compressed) or 250 hours (uncompressed)
- Internet access via built-in modem or Ethernet. Downloads cover art, titles and song lists
- Ethernet capable—transfer MP3 files, maintain and update cataloged music
- 4 recording qualities: 128kB, 192kB, 320kB and uncompressed
- Audio Outputs: 4 pr. Analog, 1 Digital Optical, 1 Digital Coaxial
- UL® Listed and CE approved
